

**TORTUE LUTH**  
*Dermochelys coriacea*

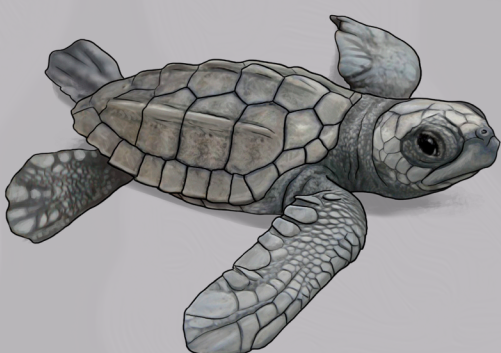

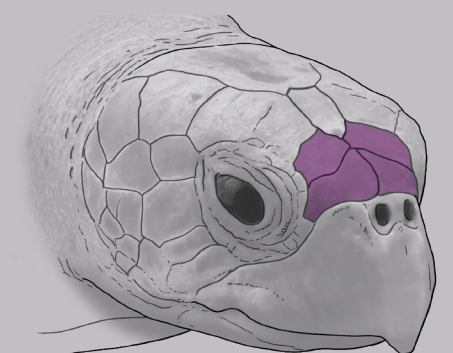

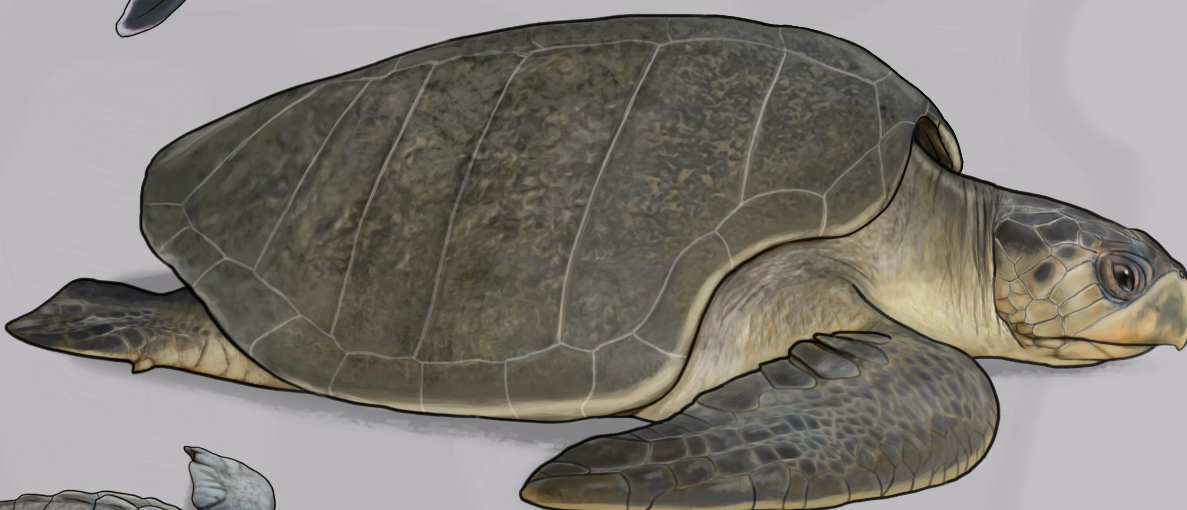

Les tortues luths qui pondent sur les plages de l'ouest et de l'est de la Guyane présentent une différenciation génétique.

**TORTUE VERTE**  
**TORTUE FRANCHE**  
*Chelonia mydas*

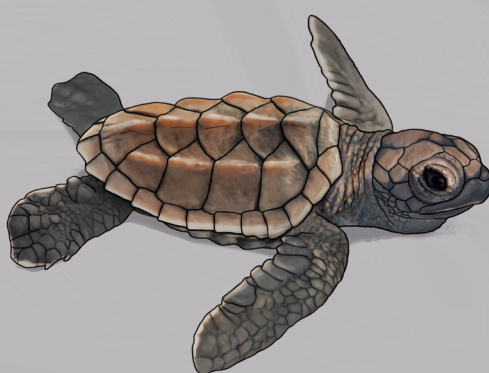

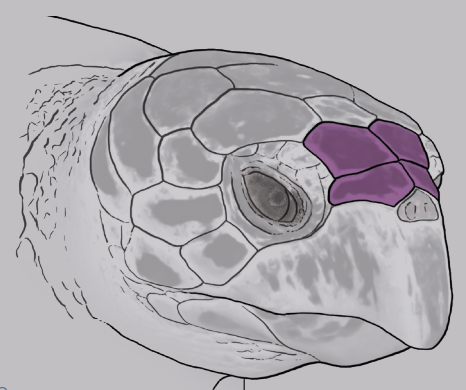

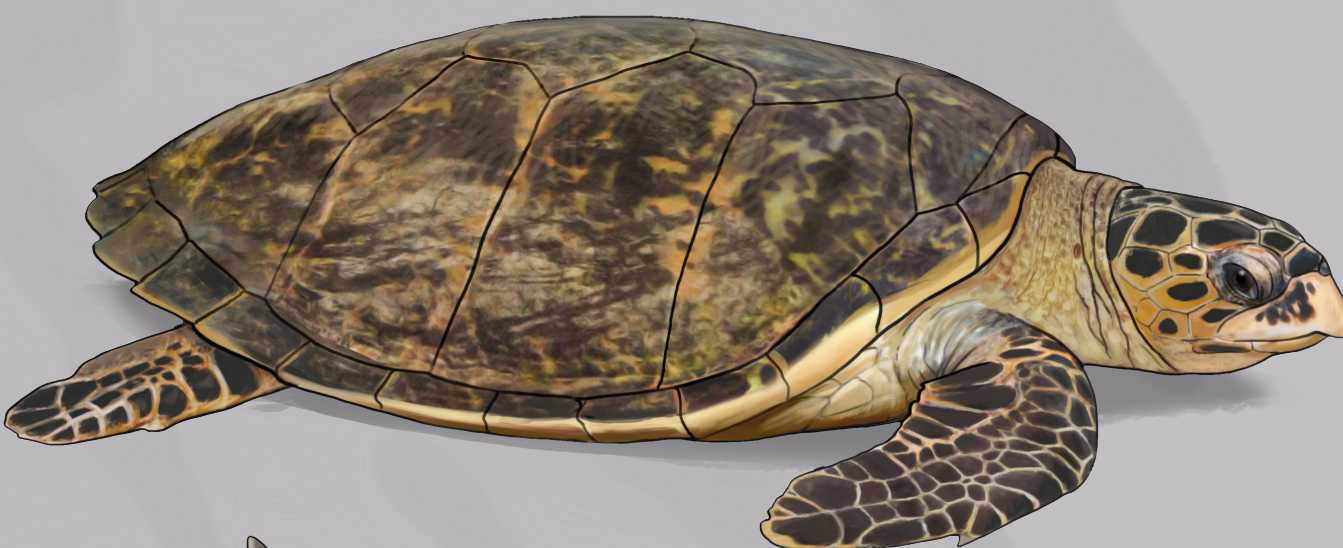

C'est la seule espèce de tortue marine présente toute l'année dans les eaux de Guyane, notamment autour des secteurs rocheux, qui constituent des zones de développement pour les juvéniles.

**TORTUE OLIVÂTRE**  
*Lepidochelys olivacea*

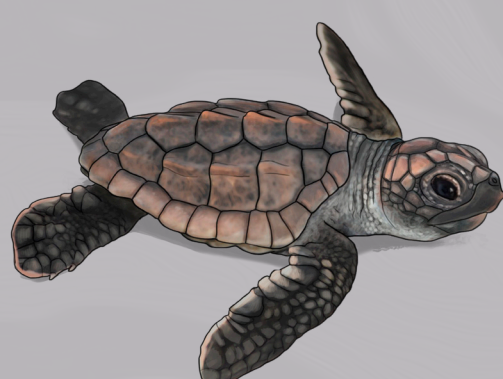

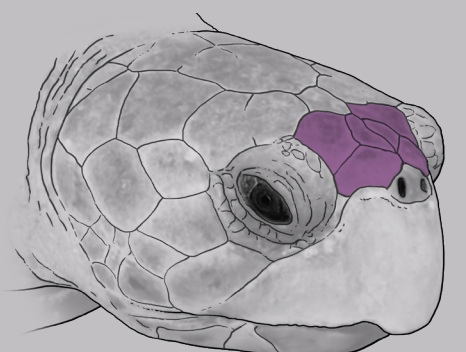

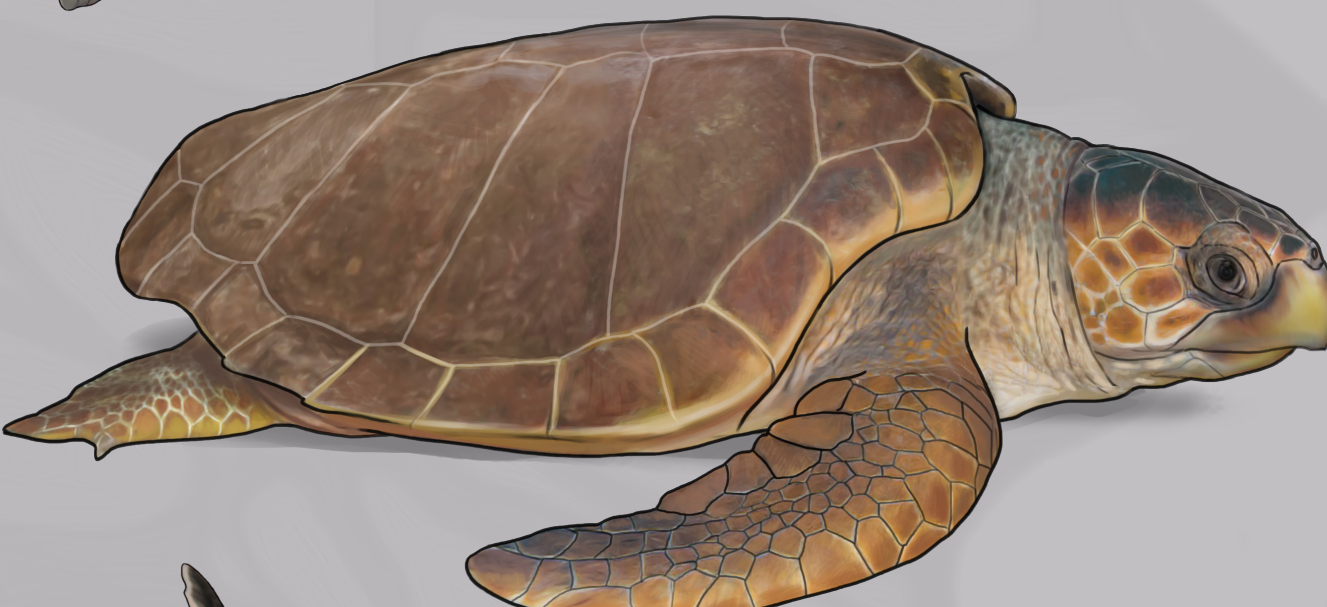

Cette espèce a la particularité de se rassembler en grand nombre pour pondre de manière synchronisée sur certaines plages : ce phénomène est appelé *arribada*.

**TORTUE IMBRIQUÉE**  
**TORTUE CARET**  
*Eretmochelys imbricata*

Très rare  
Observations occasionnelles

**TORTUE CAOUANNE**  
*Caretta caretta*

Très rare  
Observations exceptionnelles
